

# BRENO FIORESE

## Web Developer

### ABOUT ME

My goal is to contribute my knowledge and skills to a growing technology company's development team. This will help both the company and myself to grow. I am skilled at organizing work and adapting to new teams. I am also good at logical reasoning. I am committed to learning and expanding my knowledge.

### STUDIES

#### TecSerra - Technical Course

Computer Technician - 2016 (1200 hours)

Developed a furniture planning software that enables users to visualize and customize furniture in real-time, combining different colors and textures on multiple types of furniture.

#### Multiple bootcamps

2019 - Currently (~20 hours each)

Development of several cross-platform applications with React, React Native, NextJS, NodeJS and several databases.

#### JStack

2021 - Currently (+2000 hours)

This class delves into building APIs with the widely-used Express framework, along with Docker, Postgres, SQL, and design patterns like Singleton and Repository. The module culminates with a project that integrates with the API from Module 4, utilizing a self-built HTTP Client using the fetch API. Course topics include form validation, CORS, error handling, Hooks, Service and EventEmitter patterns, UI/UX best practices, Memory Leaks prevention, animations, and more - all done by hand with minimal package dependencies.

#### Software Engineering Graduation

2023 - 2027

My graduation in Software Engineering provided me with a solid foundation in software development, including core subjects such as Algorithms, Programming Language, and Systems Analysis, as well as emerging areas like Cloud Computing, Mobile Development, and Artificial Intelligence Techniques. Additionally, I developed skills in software management and quality, agile infrastructure, and software engineering security.

### PROFESSIONAL HISTORY

#### Mid-Level Web Developer

Meta | 07/2022 - Currently

As a web developer at Meta, specializing in React and TypeScript, I'm currently leading one project and have a history of involvement in another:

- **AI-Powered Chatbot** for Internet Provider Support Center (Current Project): I lead the development of an AI chatbot using React, Tailwind CSS, Redux, and TypeScript. This chatbot enhances customer support interactions, and I'm responsible for its front-end development to ensure an intuitive user interface. My leadership is backed by my experience as the most senior developer on the team, and I guide our Scrum-based collaboration for a high-quality solution.
- **ERP Software** for Internet-Based Companies (Previous Project): I have a strong history of contributing to the development of a universal ERP software for internet-based companies. My role included designing new components and pages, emphasizing scalability and usability. I collaborated with a diverse team using Scrum methodology before transitioning to lead the chatbot project.

#### Junior Web Developer

Webde Tecnologia | 01/2021 - 07/2022

I have an impressive record of developing interfaces and corporate/institutional websites. I have made crucial decisions and improvements as a part of development teams. Moreover, I specialize in restructuring legacy code and implementing the best practices of the industry in new projects. My proficiency in NextJS, PHP, and Laravel has been instrumental in creating numerous high-quality sites that meet the highest standards of quality and performance.

#### Web Developer and Support Trainee

Núcleo Sistemas | 03/2019 - 01/2020

As a trainee developer, I contributed to the installation of BI systems in numerous companies. In addition, I gained valuable experience in developing business websites for a range of organizations throughout the state, including the creation of Nucleo's own website.

### SKILLS

**Programming Languages:** HTML, CSS, Javascript (React, React Native, Vue.js, Node.js), Typescript, PHP..

**Languages:** Portuguese (Native), English (Fluent), Spanish (Conversational).
